**Methodology:**

The chart below shows the process used to calculate the total composites number. Only the industry totals are published.

## ACMA Total Composites Industry Report Q1 & Q2 2023

\*Total Composites = glass reinforced polyester/vinyl ester thermoset composites

## ACMA Industry Statistics Program Definitions

### General Program Rules and Definitions:

- General definitions for Resins and Glass Reinforcements
  - o Glass Reinforcements includes: Rovings, chopped strands & mats (continuous & chopped), converted/knitted fabrics for polyester/vinyl ester thermoset composites.
  - o Resins and Gel Coats include: Formulations of unsaturated polyester and vinyl ester resin (excluding gel coat base resins) and formulated gel coat.
- Report Gel Coat in the appropriate market categories. Exclude sales of gel coat base resin.
- Domestic Region – the United States and Canada. Exclude territories such as Puerto Rico, US Virgin Islands Guam, etc. Include all sales in the domestic region, including materials produced outside of region. DO NOT REPORT ANY EXPORT SALES.
- Manufacturers should exclude all Sales to Distributors and Convertors
- Captive Use – sales to a company that is 50% or more owned by the seller. These sales are to be included.
- Co-Producer Sales and Swaps – if you sell material to another participating company (excluding distributors) the purchasing company is to report the pounds.

### Market Segments

<b>Marine:</b>
Manufacture, maintenance or repair of pleasure, commercial or military watercraft, including component parts and motor covers. Includes formulated gel coat for Marine.
Examples include: Any part or component of a watercraft
Exclude: Infrastructure, such as docks, piers, floating structures for wind turbines and barge covers

Marine Submarkets:	Examples include:
Recreational	yachts, fishing boats, sailboats, personal water craft
Other	commercial and military craft

<b>Transportation:</b>	
Manufacture, maintenance or repair (excluding body putty) of land and air transportation vehicles, including parts or components for passenger vehicles, heavy trucks, truck trailers and aerospace.	
Examples Include:	
Accessories/after-market included	Instrument panels
Aerospace and aircraft components	Integrated Front Ends
Agriculture	Load Floors
Auto and truck body panels	Marine docks
Automotive parts	Mooring buoys
Autos	Motorcycle
Buses	Pick-up box covers
Closures: Doors, deck lids and lift gates	Pail/barge covers
Door inserts and headliners	RVs
Exterior body panels (fender, hoods, quarter panels and roof tops)	Trains
Floats	Truck caps/tonneau covers

Formulated Gel Coat for Transportation	Underbody shields and engine covers
Exclude: body putty, marine (as stated above)	

Transportation Submarkets:	Examples include:
Aerospace	personal, business and commercial aircraft
Automotive	passenger vehicle components; body panels; pickup beds
Commercial	heavy truck; agricultural & construction equipment; ground military vehicles; freight rail
Mass Transit	buses; passenger rail; subway cars
RV & Aftermarket	RVs; pick-up caps; conversion kits

Infrastructure:	
Manufacturer, maintenance or repair of parts, components or installations used in bridge, road, utility, water treatment, chemical processing, chemical and power distribution, seawalls, mining, energy, and wind.	
Examples Include:	
Bridge decks and overlays	Highway pavements
Cell towers	I-beams
Chemical processing	Light and power poles
CIPP	Manholes
Civil construction	Mining
Composite pipes	Polymer concrete
Cross-arms	Port components
Ducts	Power poles
Fences and railings and water and sewer pipes	Roads/bridges
Fittings	Tanks
Formulated Gel Coat for Infrastructure	Water treatment
Grating	Wind energy
Exclude: Commercial and residential components.	

Infrastructure Submarkets:	Examples include:
Energy	energy generation & distribution; wind, solar and hydro energy; utility structures; power poles & crossarms
Industrial	chemical processing; mining; pollution control; water processing; oil & gas; pipe & tank; CIPP
Transportation Structures	bridge, road & marine infrastructure; seawalls

Construction:	
Manufacturer, maintenance or repair of Residential, Commercial and industrial construction articles and building structure. Includes pultrusion resins unless specifically marked for infrastructure or another market segment.	
Examples include:	
Architectural decorative parts	Fixtures
Architectural columns	Floor grates
Bathroom and kitchen	Formulated Gel Coat for Construction
Baths and shower stalls	Hand rails
Building panels	Insulation screens & decorative items
Building parts	Ladder rails

Cable trays	Onyx
Columns	Reinforced concrete
Composite walls	Roofing panels
Cooling towers	Sinks
Counter tops	Skylight boards
Cultured marble	Surfaces
Door skins, cooling tower, and components	Swimming pools & spas
Electrical, construction or architectural panels	Window lineals
Electrical and electronic components	

## **ACMA Total Composites Industry Report Participants**
